

SystemOne® for HME – Data Export Module

QS/1®'s Data Export module provides enhanced data extraction and management options for SystemOne.

Advanced Capabilities

Because every HME business has different reporting needs, SystemOne features some of the most flexible reporting capabilities in the industry. Use SystemOne's Customized List and Letters function to create user-defined reports or mail merges with up to 12 fields of data. The Data Export module moves information into spreadsheet applications for further analysis.

More Flexibility

Data Export allows you to export any field from the SystemOne databases. You can run these data exports and change them as needed. Data Export allows you to export the results into several data formats based on your needs.

Training and Support

QS/1 offers interactive training to guide you during the learning process. Additional training can be scheduled to meet your needs. Service specialists provide additional product support from our toll-free service center.

- *Use up to 12 criteria for selecting data to create virtually any report needed*
- *Export data from the 15 main data files for unlimited report generation*
- *Use standard report criteria to refine and select data*
