

QS/1® Web Refill Services

QS/1 has a variety of options to help your pharmacy receive online prescription refill requests. CornerDrugstore.com® can create a professionally-developed, customer-friendly website that includes web refill ordering. Or, simply add online refill ordering capabilities to an existing website using QS/1's Prescription Refills, Express Prescription Refills or WebRx™. QS/1's newest option, mobileRx®, allows customers to request refills from your pharmacy via smartphones.

Web Refill Services from QS/1

CornerDrugstore.com

- Establish a professionally-developed pharmacy website that includes web refill ordering
- Provide premium health content within your pharmacy website
- Choose a custom URL to closely match your existing brand identity
- Promote your website and online services with our marketing tool
- Protect website data and ensure 24/7 availability with QS/1's redundant servers, networks and backup data centers

Prescription Refills

- Provide an online refill ordering experience within your existing website
- Link to existing websites built with ASP.NET, ASPX, PHP, Java or Cold Fusion (CF)
- Backup fax delivery

Express Prescription Refills

- Provide online refill ordering service via a link to a single-hosted web page
- Add a QS/1-provided link to existing website
- Add online refill ordering with minimal effort

WebRx

- Provide online prescription refills using a pharmacy-hosted web application
- Ideal for high-volume pharmacies with an existing website
- Integrate into websites built with .NET platform
- Display messages for any rejected refill requests

mobileRx

- Support customer refill ordering via browser-enabled smartphones
- Display messages related to customer-entered prescription numbers
- Display date and time prescriptions will be ready

- Communicate with your pharmacy management system and validate prescriptions in real time
- Provide simple, easy-to-use online refill ordering for customers
- Support multi-prescription customer orders
- Offer customers choice of mail, home delivery or in-store pick up
- Request authorization to contact physician for additional refills if necessary
- Deploy easily via website development kit
- Implement easily and quickly with Rapid Application Design (RAD)
- Built as web service; not platform specific
- No additional hardware or third-party software required for web server
- Operate securely via management portal displaying real-time refill activity and adjustable refill processing times
- Access QS/1's reliable service and support team
