

QS/1[®] Nursing Home Module

Supporting the needs of small-scale long-term care facilities.

QS/1's Nursing Home module provides easy-to-use tools tailored specifically to help independent pharmacies increase productivity, efficiency and profitability. As our population grows and continues to age, pharmacies need specific tools to help them serve the complex medication and reporting requirements of nearby nursing homes and assisted-living facilities.

Order Entry and Processing

Built directly into QS/1's NRx[®] Pharmacy Management System, the module delivers flexible order processing with both demand-fill and cycle-fill options. Cycle Fill automates the processing of routine medications and allows pharmacies to batch orders by facility, which helps balance pharmacy workflow.

Easy to Learn and Use

Easy-to-recognize toolbar icons and drop-down menus speed up prescription workflow and eliminate the need to memorize function key operations. Wizards guide you step-by-step through infrequently used processes. It also enables you to print Medication Administration Records (MARs).

Packaging

Easily interface with a host of productivity-enhancing tools, including automated compliance packaging, dispensing and document management systems, using industry standard HL7 interfaces.

Label Printing

Batch printing of labels and other medication documentation provides greater efficiency. The system includes speedy labeling capabilities that support efficient workflow.

Tracking, Reporting and Documentation

Print MARs, Physician Order and Psychotropic Drug Use forms by patient and facility. Delivery Sheets help facility staff reconcile the receipt of medications from the pharmacy. The module can also generate the necessary reports to document these activities, reducing time-consuming clerical work.

Patient Safety and Care

Save pertinent information, such as facility name, wing and room number, medical record number, admit date and level of care. Store patient information by facility, diagnosis, diet, exercise, lab orders, physical therapy orders and treatment orders.

- Built into QS/1's NRx Pharmacy Management System
- Handles cycle and demand fill with flexible filling and billing options
- Provides required documentation, on demand or batched by facility, through robust reporting
- Easily generates and manages MARs, physician's orders and other reports by facility, patient or wing
- Simplifies management of higher LTC volumes with built-in Workflow
- Interactive training and wizards guide you step-by-step through processes
- Additional training is available to meet your needs
- Customer support agents provide additional assistance
- Easy-to-use system helps staff get up to speed quickly
