Gain Business Intelligence

Make informed, data-driven decisions that increase revenue and improve patient outcomes with Mevesi® business analytics and patient management. Fine-tune your pharmacy's operations and increase adherence with enhanced patient communication and monitoring tools.

Unlimited Insight

Mevesi® helps maximize on your investments by aggregating real-time metrics from existing data such as prescription, drug pricing, and accounting data. Easy to use reports facilitate forecasting, margin evaluation, inventory control, and operations monitoring.

Integrated Intervention Management

Automate patient monitoring, pharmacist coordination, and patient education. Fully automate the care path for COPD, diabetes, hypertension, and high-risk patients. Send and receive notifications and updates based on your patients' needs.

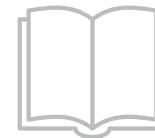

Enhanced Patient Engagement

Involve patients and partners in their healthcare routine through automated or scheduled communication. Send notices and reminders via text, email, fax, or phone and track and measure your outreach. Patients receive extraordinary healthcare services based on data, improving customer satisfaction and retention.

"In less than five minutes you can build a dashboard that shows data across all systems. This tool allows us to identify anything that could be slowing financial progress. We have identified new avenues of potential revenue and productivity."

Rusty Lee, Senior Vice President of Ancillary Services – ElderCare
