

# NRx<sup>®</sup> Pharmacy Management Software for 340B Pharmacies

QS/1<sup>®</sup>'s NRx Pharmacy Management System makes 340B simple and affordable by maintaining multiple inventories. The system eliminates the need for stocking costly additional inventories by borrowing and replacing drugs electronically from the pharmacy's single inventory.

## 340B Management

Use NRx to manage one or more 340B programs without the need for a separate system.

With QS/1, 340B programs are easy to set up. You can create formularies and automatically reorder drugs from your wholesaler. Our customizable reporting meets the requirements of contract Federally Qualified Health Centers (FQHCs) and auditors. QS/1 is an approved member of the Apexus<sup>®</sup> Prime Vendor Program.

## Get a Total Solution

In addition to pharmacy management, QS/1 offers integrated solutions for IIAS-compliant Point-of-Sale, Multi-Site Management (MSM<sup>™</sup>), IVR and more. Based on your pharmacy's needs, enhance NRx with optional services such as online refills, images and imprints, document imaging, central patient profiles and more.

## Flexible Workflow Management

NRx's integrated Workflow enhances patient safety, productivity, efficiency and HIPAA compliance. Pharmacy at a Glance allows you to manage activities from any workstation, alerting you to potential problems before they become bottlenecks.

## Efficient Multi-Location Management

QS/1's integrated systems allow secure sharing of patient and doctor demographics among locations and prescription transfers between pharmacies.

## Interfaces

Take advantage of automated dispensing and packaging systems, e-prescribing networks, delivery systems, IVR and billing systems via QS/1's interfaces. Interfaces to eMR and eHR systems give you the connectivity you need.

Our 340B vendors include: American Health<sup>®</sup>, CaptureRx<sup>®</sup>, eAudit Solutions, Macro Helix, Pharmaceutical Strategies Group, Ramsell, Sentry<sup>™</sup>, SUNRx and Talyst<sup>®</sup>.

- The industry's only solution for integrating HME, pharmacy, POS and IVR
- Provides management of multiple inventories, affordably meeting federal 340B requirements
- Detailed reporting satisfies FQHCs and auditors
- Provides duplicate drug records for NDCs
- Easily exports data
- Improves safety with integrated document imaging, electronic signature capture and on-screen pill images and imprints
- Clinical checking for drug-drug, drug-disease and drug-food contraindications, as well as allergies, duplicate therapy, geriatric precautions and min-max dosing
- Allows Clinical Checking to be assigned during any stage of the workflow process
- Enhances productivity with InstantFill<sup>®</sup>, and interfaces to automated dispensing and packaging systems
- Improves pharmacy efficiency with integrated workflow that includes a tickler file of pending prescriptions, refill reminders and IVR requests
- Enables you to accept payments and signatures at the point of delivery with Remote Checkout<sup>®</sup>
- Provides communication with patients via email and/or text
