

# A pharmacy management solution that grows with your business.

## Front-to-Back Pharmacy Management

QS/1's NRx enhances your pharmacy's productivity with tools to simplify workflow, process claims, manage inventory, and more. NRx integrates with other QS/1 products, including Point-of-Sale, SystemOne® for HME, Multi-Site Management (MSM™), inbound/outbound IVR, and Web Refill Services to provide a comprehensive approach to pharmacy software.

*"They have the tools with QS/1 to make [us] more efficient. We do more with less. It's proven when we do financial data and when we compare it to industry standards; we are two to three times more efficient per employee than the national average on sales per employee, gross profit per employee... I have to attribute that to QS/1 because they make us more efficient."*

Darden Heritage, R.Ph.  
Star Discount Pharmacy

### Easy Fills

Automatically queue eligible IVR and web refills, print labels, and send them to dispensing systems. Reduce data entry by scanning barcodes to auto-populate information. Automatically receive and transmit e-prescriptions, estimate reimbursement before sale (DIR), and speed checkout with a Will Call system that locates prescriptions quickly.

### Pricing Control

Take advantage of full-scale pricing control. Choose pricing structures based on third-party pricing, drug price plans, or your own pricing structures. Create formulas for determining prescription price.

### Better Patient Outcomes

Increase adherence with our refill reminder tool that automatically refills routine prescriptions and can call, text, or email pick-up reminders to patients. Synchronize all patient refills for pick up the same day of the month. Use MTM tools to document outcomes, SOAP notes, lab values, and immunizations.

### Extensive Interfaces

Choose the pharmacy management software that works with 300+ interfaces and services from other vendors – more than any other provider. Keep your pharmacy competitive with easy connections to additional technology solutions that boost workflow efficiency and enhance patient engagement.
