

Remote Backup and Recovery Service by QS/1®

Ensure your business can recover quickly from ransomware, malware, or a natural disaster.

The Remote Backup and Recovery Service by QS/1 helps you recover from all sorts of data corruption or loss issues. From hardware failure, virus, or other malware to a natural disaster, this solution protects your operation and gets you back in business as quickly as possible.

Key Features:

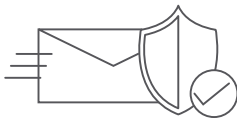

Secure Backup

Automatic daily backups saved at two geographically separate data centers via transmissions encrypted with government-certified FIPS 140-2 AES.

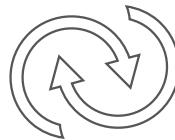

Cloud-Based Access

Online access to your software if needed, so you can quickly begin operations while QS/1 works on a new server and data restoration.

Verification

Daily confirmation email sent after successful backup, so you know your data is safe.

Recovery

Includes equipment replacement (with QS/1's Hardware Maintenance), data reloading, system configuration, and testing.

Additional Features:

- Data-storage locations have 24/7 monitoring, redundant communication links, and power generators
- System maintains the 10 most recent backups as additional safeguard
- Choose your preferred time of day for data backup
- Notification if there is a failure in daily transmission or backup
- Complies with legal requirements for customer data protection

Benefits:

Peace of mind against ransomware, malware, or a natural disaster.

The technical and staff resources you need to get back up and running quickly.

A way to continue to serve patients during data recovery.
